# Overview

## Identification

---

### **ID NUMBER**

YEM\_2005\_HBS\_v01\_M

## Overview

---

### **ABSTRACT**

The main objective of the Multipurpose Household Budget Survey 2005/2006 is to collect data and indicators that cover various aspects of the Yemeni household's living conditions, such as spending, housing, health, education, and employment, on the governorate level. The availability of such data will enable the local administration authorities to devise information-based development plans, on the lowest administrative level.

The implementation of the MPHBS 2005-2006 is advantaged by the availability of technical and administrative expertise, making the planning and preparations to the international standards for such surveys. Also, the experience of the CSO in implementing similar surveys has enabled the elimination of errors and shortcomings of previous similar surveys, aiming at the collection of high-quality data that meets the needs of different government institutions, as well as the needs of researchers, investors, and other stake-holders. In addition, such data will enable the update of indicators pertaining to the Consumer Price indices, household consumption levels, and National Accounts.

### **KIND OF DATA**

Sample survey data [ssd]

### **UNITS OF ANALYSIS**

- Households
- Individuals
- Consumption expenditures services/ commodities

## Scope

---

### **NOTES**

The 2005-2006 Yemen Household Budget Survey covered the following:

- Household Roster
- Activities
- Dwelling Conditions
- Health (Diseases, Illnesses, and Accidents)
- Preventive Health Care and Vaccinations
- Education
- Anthropometrics
- Wage Earnings
- Agriculture and Fishing Activities
- Private Business Activities
- Other Income during the Past 12 Months

- Inventory of Durable Goods
- Loans
- Weekly Consumption of Food and Other Frequently Purchased Commodities
- Expenditures on Non-food Services and Commodities during the Past Month
- Expenditures on Non-food Services and Commodities during the Past 3 Months
- Expenditures on Non-food Services and Commodities during Last Year (12 months)

# Sampling

## Sampling Procedure

---

The sample frame for the HBS was the 2004 Population Census. Yemen consists of 21 governorates. The study population was sorted into 38 strata. 17 governorates were represented by two strata (urban and rural,) whereas Sana'a City and Aden are only urban and Raima and Sana'a Region are only rural. This resulted in 19 urban strata and 19 rural strata.

Within each stratum, the sample was selected in two stages. In the first stage, a certain number of Census Enumeration Areas (EAs) were selected with probability proportional to size (pps,) using as a measure of size the number of households according to the pre-census estimates available in January 2005. In the second stage, 12 households were picked from each EA by systematic equal probability sampling (seps).

In order to produce estimates of consumption in all governorates of both rural and urban populations, the total sample of 1,200 EAs was distributed across strata by a combination of allocation proportional to size and equal allocation.
